

2026 | CASE STUDY | NETWORK SCIENCE

IMPLEMENTING ZERO CODE ERP FOR STREAMING MEDIA COMPANY

Overview

1.

A rapidly growing media production company operated on fragmented systems – disconnected finance, HR, and production tools that generated data silos, manual errors, and reporting delays. Network Science implemented Zero Code ERP to consolidate operations into a single, automated, cloud-based platform.

Solutions & Strategy

2.

Implemented a Zero Code ERP platform to unify business operations, automate workflows, and provide real-time visibility across finance, HR, inventory, and project management.

Solution

Enterprise Process Consolidation

Workflow Automation

Cloud ERP Infrastructure

Real-Time Business Visibility

4.

- Manual workloads reduced by 40%, freeing teams to focus on creative and strategic priorities.
- Financial reporting accuracy and efficiency improved by 40%.
- Project turnaround time cut by 30% through automated workflows.
- Overall productivity increased by 25%.
- Regulatory compliance embedded directly into workflows.

Result

40%

Less Manual Work

30%

Faster Turnaround

25%

Productivity Increase

By implementing a Zero Code ERP platform, Stream Box Media improved operational efficiency, enhanced collaboration, and gained real-time visibility to support scalable growth.
