

2026 | CASE STUDY | NETWORK SCIENCE

TRANSFORMING **VENDOR MANAGEMENT** PROCESSES

Overview

1.

One of the world's largest confectionery manufacturers was held back by manual procurement processes — slow RFP preparation, chaotic bid management, inconsistent vendor evaluation, and inaccurate inventory tracking. The company implemented Microsoft Copilot to automate and standardize the full procurement lifecycle.

Solutions & Strategy

2.

Leveraged Microsoft Copilot to automate procurement workflows, streamline vendor management, and provide real-time visibility across the sourcing and inventory lifecycle.

Solution

RFP & Bid Automation

Competitive Vendor Analysis

Automated Sourcing Operations

Inventory Monitoring System

4.

- RFP preparation time cut by 50%.
- Supplier quality and consistency improved by 25%.
- Procurement and inventory activities consolidated into a single transparent view.
- Decision-making speed and quality improved across all sourcing and supply chain functions

Network Science helped this global manufacturer with the automation it needed to compete at speed. Standardized, data-driven procurement replaced manual bottlenecks — cutting time, improving supplier outcomes, and giving leadership real-time control over the entire procurement chain.
